EDUCATION

University of California, San Diego

Sep. 2023 – June 2027

Bachelor of Science in Computer Science & Engineering

La Jolla, CA

- Association for Computing Machinery (ACM) **AI Competitions Team**
 - * Developed **ML/AI** competitions for student programmers, emphasizing efficiency and optimization.
- **Relevant Coursework:** Data Structures, Design & Analysis of Algorithms, Discrete Mathematics, Theory of Computation, Database System Principles, Applications of Computing & Systems

EXPERIENCE

Startup Software Engineering Internship

July 2024 – Sep. 2024

Acting Connect

San Diego, CA

- Created a **full-stack web application** for actors to communicate directly to producers, increasing user engagement and reducing third-party dependency.
- Implemented secure **REST API** endpoints for authentication, messaging, and transactions with token security.
- Built responsive **UI** components using **JavaScript, React, HTML, and CSS** for seamless and user-friendly experience in both mobile and desktop devices.
- Collaborated in an **Agile development environment** with **GitHub** for version control to develop features, report progress, and brainstorm user stories.

Cybersecurity Engineering Apprenticeship

Mar. 2025 – June 2025

Net Serpent LLC

La Jolla, CA

- Developed **AI-assisted** network packet classification pipelines to distinguish between benign and malicious traffic.
- Increased application performance by **~6%** by **optimizing cryptographic and hashing algorithms** in the user authentication system.
- Implemented a **ZeroMQ messaging service** to transmit preprocessed packets efficiently across distributed systems for real-time classification.

PROJECTS

News Recommendation Website | *Python, FastAPI, SQLAlchemy, Pydantic, scikit*

May 2025 – Dec. 2025

- Built a personalized news recommendation system achieving a **70% - 80%** content relevance by using a **K-Nearest Neighbors (KNN)** machine learning model and user interaction data.
- Designed **relational (ORM) databases** with **SQLAlchemy** to track user interactions (dislikes, likes, views), articles, and keywords extracted with **TF-IDF**, and sensitive user information.
- Implemented secure authentication and authorization using **JWT + OAuth2** to support scalable sign-up and login workflows.
- Developed **REST APIs** with **FastAPI** backend with uniform **HTTP** request and response schemas made using **Pydantic**.
- Integrated a **React front end** with **Axios** to deliver clean and modular **API-driven UI**.

Similar Product Finder App | *Python, Flask, Bootstrap, scikit, Pandas, Numpy*

Aug. 2025 – Present

- Built a **machine learning-driven** web app that finds products based on user query achieving **80% - 90%** accuracy by using various product feature vectors.
- Processed and analyzed large **CSV datasets** from **Kaggle** using **Pandas + Numpy** for feature extractions and normalizing data.
- Implemented a scalable **Flask app** design with secure sign-up and login **APIs**.
- Designed a responsive front end using CSS framework **Bootstrap** and modular **HTML** templates to improve usability and accessibility.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, Assembly, HTML, CSS, JavaScript, TypeScript, SQL.

Frameworks & Libraries: FastAPI, scikit-learn, PyTorch, SQLAlchemy, Pandas, Numpy, Pydantic, JWT-Auth, React, Flask, Bootstrap.

Developer Tools: Github, VS Code, Google Cloud Platform, vim, Linear, Docker, Kaggle, Git, PostgreSQL.
